DATA SECURITY

The SSL (Secure Socket Layer) security software used by PM-International is currently one of the best technologies available.

When paying for the respective service, you have the option of choosing between various payment options. With each option, your payment details are encrypted for transmission. This means you can be sure that your data cannot be read by a third party. This transmission is therefore much more secure than transmitting your personal data over the phone.

For PM-International, security is not just about protecting your data on the payment method you choose. PM-International will make every effort to ensure that your order documents, goods or other documents reach you exactly at the time we have sent them to you.

PM-International may amend this Data Privacy Policy from time to time as it deems necessary or appropriate. The revised policy will apply from the date it is available on our website.
